

## 48 pieces of 182 double-glass modules

Featuring a low temperature coefficient of  $-0.26\%/^{\circ}\text{C}$ , these bifacial modules maintain stable power generation even under high-temperature conditions. This design minimizes thermal ...

The 182-16BB double-glass module rolled off the production line this time uses M10 large-size silicon wafers, and adopts the revolutionary water-free and non-destructive ...

Recently, VSUN 182 double-glass modules successfully passed the IEC 62759-1 standard test on packaging and transportation, and received the full sequence test certificate for packaging and ...

Dual-glass module is based on 182mm large-size silicon wafers, high power, high efficiency, high compatibility, high quality and low BOS. It can reduce the risk of fire, increase moisture ...

Featuring double glass lamination and solid PID resistance, our modules ensure a 30-year product lifetime with minimal power degradation, reducing operational costs and ensuring long ...
