

## **585wp    monocrystalline    double-glass components**

These panels are designed with dual glass construction and a robust aluminum alloy frame, making them highly resistant to snow loads, high wind pressure, and extreme temperatures.

Its dual-glass design ensures enhanced durability and bifacial energy yield, making it ideal for commercial rooftops, utility-scale farms, and high-reflection surfaces.

Long-Term Durability: Designed with PID-free encapsulation, robust glass, and high-quality components, this panel is built to withstand the test of time, reducing maintenance and ...

Advantages of double-glass structure: It enables bifacial power generation with a high ratio, maximizing light utilization and exhibiting excellent mechanical properties.

Double Glass Durability - increased durability, weather-resistances, UV resistant and withstand high temperatures and strong wind loads. Longer Life Span - high durability increases overall ...
