What is the best portable power station?

The Jackery Explorer 1500 Portable Power Station is our recommendation for the overall best portable power station. With a large battery capacity that can power a television for 21 hours and a variety of outlets and ports, it's suitable for home emergencies, camping, and job site use.

How to choose a portable power station for camping?

Setting one up inside a home or workshop means close quarters, and loud models could literally require hearing protection. A portable power station for camping should also be quiet, or else it may disturb the neighbors. Typically, electric and solar power stations make for the quietest generators available.

Which solar power station is best for off-grid camping?

The Jackery Solar Generator 1000 is a complete solar-powered portable power station package, which is why I think it's the best option for off-grid camping. I use Jackery's solar panels with my Explorer 1500, but they work just as well with this model (as a package deal).

What is the best portable power bank?

If the only thing you need to keep powered up is your cell phone, the Nimble Champ is the best option. This compact little power bank doesn't have any of the features found in bigger portable power stations, but it's small, easy to carry, and is made from recycled materials—including sustainable packaging.
