Will a new lithium mine come on stream in Argentina?

That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world. For all the money that's poured into Argentina's giant lithium deposits, the country has seen just one new mine come on stream in almost a decade. That's about to change.

Does Argentina export lithium?

Despite a flurry of prospecting and development, only three operations in Argentina currently export lithium. That's still enough to have established the country as a major producer behind Australia, neighbouring Chile and China. Of the three, only one is a newcomer -- Minera Exar, which is majority owned by Ganfeng Lithium Group Co.

Argentina's energy planners have a not-so-secret weapon: hybrid solar-lithium farms where panels and batteries work together like tango partners. The result? Grid stability ...
