

A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage ...

In India, developers are moving quickly to pair renewables with advanced storage technologies. Companies like Envision and SUN Terra are planning multi-hundred-megawatt ...

Synopsis What policy and regulatory changes are necessary to incentivise large-scale hybrid-BESS deployment across Asia? How can energy storage be leveraged to improve energy ...

With countries aiming to hit 23% renewable energy targets by 2025, energy storage projects have become the region's new superheroes. From battery farms in Vietnam to pumped hydro in ...

Energy storage deployments in emerging markets worldwide are expected to grow over 40 percent annually in the coming decade, adding approximately 80 GW of new storage capacity ...

Wärtsilä; has delivered a number of projects in the region, including Singa-pore's first-ever pilot grid-scale battery energy storage system (BESS) and several large-scale projects in the ...

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts ...

In order to give full play to the positive role of distributed energy storage systems in renewable energy grids, this paper studies the optimization of unit portfolios with virtual power plants. A ...

The proposed regional TA aims to facilitate the scale up of battery energy storage system (BESS) deployment in the ADB's DMCs to enable the high penetration of renewable energy ...

Asia Distributed Energy Storage Projects
