

How much solar power does Austria generate?

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity.

Will Austria achieve a 100% renewable electricity production by 2030?

Austria aims to achieve a 100% renewable electricity production by 2030 with 1,000,000 homes having solar panels fitted by that date. 11 TWh of extra photovoltaics will be needed above 2021 levels. [^]"Electricity Data Explorer".

How many natural gas power plants are there in Austria?

There are currently 16 natural gas power plants in Austria and 3,4 GW power made by pump hydro storage power plants. E-Control is the regulatory authority in Austria responsible for the electricity and gas industry. The TSO and the larger DSO's are mainly owned by the federal and regional governments.

How secure is Austria's electricity supply?

Austria's security and reliability of supply - with an electricity grid availability of over 99.99% - is among the best in the world. Secure and efficient electricity supply is the basis of our modern society - now and in the future.

Why is APG a prerequisite for a secure electricity supply in Austria?

The investment projects of APG envisaged in the grid development plan are therefore a prerequisite for a secure electricity supply in Austria. Furthermore, the NEP projects are an essential building block in the transformation of the energy system and for Austria's climate protection and energy targets.

What is Austria's energy policy?

The energy policy goal in Austria is set with 100% electricity from renewable energy sources by 2030 and climate neutrality by 2040.

Solar power in Austria contributes 8.82 TWh of generation to the Austrian grid, accounting for 11.2% of total electric power generation as of 2024, with 8.48 GW of installed capacity. In addition to supporting PV installations through permitting simplification and cash grants, the Austrian government is targeting 100% renewable electricity ...

For the purposes of this report, PV installations are included in the 2022 statistics if the PV modules were installed and connected to the grid between 1 January and 31 December 2022, ...
