How does balcony solar work?

Just plug in! It's really that easy. "Balcony Solar" is a totally independent power system, so to use it you'll need to plug your devices directly into the portable power station and it basically operates like a giant battery. Remember, every watt of electricity you generate from here is free fuel for your favorite device!

How long does a Bahama solar installation take?

Bahama Solar installs: Solar installation is the fun part, our customers get to see the whole system come together. Installation timelines range from one to five days. Installation Steps Monitoring insures your solar panels are working properly by tracking the output of your solar system.

Is balcony solar reshaping the solar industry?

This change has exploded adoption and is reshaping the industry. In the United States, off-grid "Balcony Solar" systems are allowed but grid-tied "Balcony Solar" is not allowed by the US electrical code because back-fed outlets are prohibited -- except for in Utah (March 2025)!

Is balcony solar allowed in the US?

In the United States, off-grid "Balcony Solar" systems are allowed but grid-tied "Balcony Solar" is not allowed by the US electrical code because back-fed outlets are prohibited -- except for in Utah (March 2025)! We have hope that this policy may change to align with the European model.

Should I upgrade my balcony inverter?

If the output of a balcony plant is regularly approaching the 600 watt limit, then an 800 watt inverter may be worthwhile. If the output is already well below that level, then switching to a different panel output and orientation makes little sense - at least without increasing the solar module output. You should consider upgrading if:

Solar gives you the option for complete energy independence. Whether you're looking to reduce your electricity bill, get completely off-grid, or set up a battery backup system, we can help.
