

# Base station power equipment cabinet installation

What are the minimum clearance requirements for a base station?

Minimum clearances must be maintained between the cabinets and surrounding building parts/cabinet to accommodate the installation and maintenance of the base station. The following constraints must be considered for cabinet clearances:

Where should a battery cabinet be installed?

The battery cabinet must be installed adjacent to the power cabinet. The following diagram shows the equipment layout for a typical new indoor Macrocell site. Notes: The cabinets may be placed with zero clearance to the rear wall. The cabinets may be placed with zero clearance to the side wall, however some clearance is recommended.

What is the minimum space between ezbf frame and UMTS macrocell cabinet?

Minimum space between the EZBFI frame and the adjacent cabinet or frame is 57 mm(2.24 in.) (if the edge of the template is cut at the dotted line). The following diagram shows the clearance requirements for the indoor UMTS Macrocell cabinet from the top of the cabinet to the cable rack and from the top of the cable rack to the ceiling.
