

Bornovo produces solar panels

Where are thornova solar panels made?

While having manufacturing capacities in Vietnam, Thornova strategically focuses on the North America markets. Their power output ranges from 400W to 720W, while their efficiency generally floats from 20.5% to 23.2%. Thornova solar panels are backed up with a 15-25-year product and 25-30-year performance warranty.

How much power does a thornova solar panel produce?

The power output of Thornova solar panels ranges from a respectable 400 watts all the way up to a stellar 720 watts, translating to significant energy generation for your home. Efficiency-wise, they typically hover between 20.5% and 23.2%, ensuring you get the most out of the sunlight hitting your panels.

Is thornova a good solar panel company?

Newcomer status: Established in 2022, Thornova is a relatively new company in the solar panel market. While they've achieved Tier 1 ranking, a longer track record can provide more confidence for some consumers. ?
Limited independent reviews: Due to being new, there are fewer independent reviews available compared to more established brands.

Why is thornova solar moving away from Sunova solar?

As climate change is one of the most dramatic challenges of our time, with our solar modules we want to contribute to the preservation and defence of a planet worth living on. With this in mind, we have decided to move past the Sunova Solar brand and continue our future as Thornova Solar.

Who are Sunova solar & thornova solar?

Sunova Solar and Thornova Solar are Tier 1 players, focusing on energy solutions and the design and manufacture of renewable energy components, such as photovoltaic modules, solar cells, inverters and solar battery storage solutions.

What is a thornova ts-bb60 solar panel?

This all-black Thornova TS-BB60 solar panel offers a perfect blend of beauty and function. Its sleek design complements your home's architecture, while still generating a substantial 445-460 watts of power with 20.6%-21.3%.

We have a production capacity of 6.5 GW of PV modules and 11.5 GW of solar cells across our operations in China and Indonesia. In 2025 we plan to add additional capacity in the USA.
