

A 200MW/400MWh BESS project in China combining lithium-ion and sodium-ion batteries has been put into operation. The project in Qiubei County, Wenshan Prefecture, Yunnan Province, ...

Longyuan Power, a subsidiary of China's state-owned mining and energy company CHN Energy, has successfully connected to the grid the first phase of its landmark 320 ...

On Sunday, its first lithium-sodium hybrid energy storage station began operation, marking a major step toward hybrid battery storage at scale. Located in Southwest China's ...

A hybrid battery energy storage system (BESS) combining Lithium-ion and sodium-ion technology with a capacity of 200MW/400MWh is now fully operational in Qiubei County, ...

By combining lithium batteries, supercapacitors and sodium-ion battery systems, the project establishes a cost-effective, durable and grid-supportive hybrid energy storage model.

3 hours ago; China is looking to almost double its so-called new energy storage capacity to 180 gigawatts (GW) by 2027, according to an industry plan announced by authorities on Friday.
