

# Container cold box power generation weight

What is a containerized generator set?

The durable and robust Containerized Series generator sets are ideally suited for independent power producer (IPP), mining, oil and gas, or any project where harsh conditions, challenging environments and the demand for reliable, continuous remote power exist.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

What is a Tier 4 containerized generator?

Our Tier 4 containerized generators are high-powered --500 kW to 1250 kW-- units packaged in 30-foot or 48-foot ISO containers.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

Can a solar-powered refrigerated container help fight food waste?

That's it! The solar-powered refrigerated container has the power to fight food wastewhile providing cold storage for vaccine,blood,or medicine all through commercial cold storage. Off-grid refrigeration can be valuable for humanitarian organizations and governments.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements,the new Cummins Containerized Series generator sets can provide significantly shortened lead time for installation,and a lower cost of ownership via a flexible design.
