

How does Croatia get its electricity?

Croatia satisfies its electricity needs largely from hydro and thermal power plants, and partly from the Krsko nuclear power plant, which is co-owned by Croatian and Slovenian state-owned power companies. Renewable energies account for approximately 31.33% of Croatia's energy mix.

How many power plants are there in Croatia?

At the end of 2022, the total available power of power plants on the territory of the Republic of Croatia was 4,946.8 MW, of which 1,534.6 MW in thermal power plants, 2,203.4 MW in hydropower plants, 986.9 MW in wind power plants and 222.0 MW in solar power plants.

Which genset containers are available?

All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C. A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from -25°C to +40°C. The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer for the Type 2 / 3 / 4 containers.

What are the sound pressure levels available for genset containers?

Lower sound pressure levels are available on request. The standard ventilation is designed for ambient temperatures from -25°C to +34°C. All genset containers are also available with an option for -40°C and most variants can be upgraded for +45°C.

Distributed energy station refers to a clean and environmentally friendly power generation facility with low power (tens of kilowatts to tens of megawatts), small and modular, and distributed ...

1 day ago; Rijeka Gateway, they reported, represents the largest private investment in logistics in Croatia, and it becomes the most modern and technologically advanced container terminal in ...

CNTE is a high-tech enterprise integrating R& D, production, sales and service of lithium battery energy storage equipment, with energy storage application technology as the core, providing ...

Hydrogen-based fuel cell technology is currently generating significant interest across multiple industries as

Croatia power generation equipment container

companies worldwide seek to lower the carbon footprint of their operations in line ...

The electricity generated from solar power accounts in average for 5% in the European Union and only 0.4% in Croatia. To reach the EU average, Croatia would need to add an additional 700 ...

Rijeka Gateway, a major logistics project in Croatia, has secured electricity from renewable energy sources for the container terminal operation. This is expected to reduce ...
