Why should Cuba invest in solar energy?

Cuba intends to be a active participant in global objectives on reducing greenhouse gas emissions. In this sense, solar energy is one of the most promising renewable sources in Cuba and a fundamental pillar in its strategy of transition to clean energy.

What is a solar park plan in Cuba?

The objective of the solar park plan in Cuba is the construction of a total of 92 photovoltaic installationswhich, according to the official schedule, should be completed before 2028. Each of these parks would have a capacity of 21,87 MW, which would allow for an estimated total generation of around 3.400 gigawatts/hour per year.

Will Cuba build a new thermoelectric plant in 2023?

The project was scheduled to conclude on June 30,2023,with a budget of \$3.4 million. The Cuban state forecasts generating 30,000 GWh by 2030,an almost unattainable goal. Not only are there no plans to build new thermoelectric plants,but the National Electric Union (UNE) currently supplies only 56.6% of the energy it provided five years ago.

How many solar parks does Cuba have?

Cuba builds 59 solar parksto reduce its dependence on fossil fuels. 92 solar parks are expected to provide 2.000 MW by 2028. The country faces financial challenges but is working on new strategies with international help.

Is Cuba a potential energy giant?

Cuban territory receives a significant amount of solar radiation, with an average of more than 1.800 kilowatts per square meter annually, which places Cuba as a potential energy giant if it takes advantage of this resource optimally.

La actual situación energética en Cuba se ha visto agravada en los últimos días, cuando el país vivió uno de los mayores apagones de su historia. Ante este complejo ...
