

# Energy Storage Project Business Plan

What is an energy storage project?

An energy storage project is a cluster of battery banks (or modules) that are connected to the electrical grid. These battery banks are roughly the same size as a shipping container. These are also called Battery Energy Storage Systems (BESS), or grid-scale/utility-scale energy storage or battery storage systems.

What is the Energy Storage Safety Strategic Plan?

The Energy Storage Safety Strategic Plan was developed by Pacific Northwest Laboratory and Sandia National Laboratories with the support of the Department of Energy's Office of Electricity Delivery and Energy Reliability Energy Storage Programs since July 2015.

How many energy storage projects are there?

There are three energy storage projects. They will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

Where are the energy storage projects being built?

The energy storage projects will be located at three existing SCE power substations: 225 MW at Springvale Substation in Big Creek-Ventura, 200 MW at Hinson Substation in the Los Angeles Basin, and 112.5 MW at Etiwanda Substation in the Los Angeles Basin.

How to make energy storage bankable?

Stacking of payments is the most common way to make the business model for energy storage bankable whilst optimizing services to the grid. In its simplest version it contains: Let the best technology provide the service(s) the grid needs. Thinking of technology first could do the grid a disservice. I o n e p r o j e c t s ? I t d e p e n d s ... .

This webpage includes information from first responder and industry guidance as well as background information on battery energy storage systems (challenges & fires), BESS ...
