

Energy storage industry becomes a new export

Is China entering a new era of energy storage demand?

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include energy storage capacity. However, the Chinese market is entering an era of change.

Which emerging markets will lead the storage industry in 2025?

In Latin America, momentum was built as storage deployments increased by 42%. In 2025, emerging markets for storage will be on the rise. Saudi Arabia will lead the charge, fuelled by its expansion of solar and wind generation.

Will energy storage growth continue through 2025?

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected through the fourth quarter of 2024, energy storage investments and M&A activity are expected to continue this trajectory through 2025.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

How has the IRA impacted the energy storage industry?

The energy storage industry has continued to progress over the course of 2024 and into 2025, buoyed in significant part by the federal income tax benefits in the form of tax credits enacted under the IRA. Energy storage was one of the major beneficiaries of the IRA's new rules on both the deployment and manufacturing sides.

Will energy storage grow in 2024?

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours (MWh), year-over-year in 2024 and are expected to go beyond the terawatt-hour mark before 2030.

Let's face it - home energy storage systems are having a moment. Imagine your house acting like a giant power bank, but instead of charging phones, it's keeping your lights ...

The Export Gold Rush: Why Special Cabinets Matter Global energy storage deployments are predicted to leapfrog 56 GW by 2027 (Wood Mackenzie data). But here's the kicker - 43% of ...

Energy storage industry becomes a new export

With solar and wind generation projected to supply 35% of global electricity by 2025, battery storage systems have become the linchpin of clean energy infrastructure. The export market ...
