

EIA program for the Kapusta pumped hydro storage power plant project is now available The aim of the Noste energy storage project is to build 1-3 small-scale pumped hydro ...

The status of these energy storage technologies in Finland will be discussed in more detail in the next sub-sections, giving a better understanding of the current and potential ...

A seasonal thermal energy storage will be built by Vantaa Energy in Vantaa, which is Finland's fourth largest city neighboring the capital of Helsinki. When completed, the ...

The first project, currently under construction, consists of 13 new grid scale battery energy storage systems across the south of Sweden, and is planned to add an additional 196 ...

The project is one of the largest of its kind in Finland and adds storage to RPC's growing renewables portfolio in the region, including over 170 MW of onshore wind in operation across ...

This report provides an initial insight into various energy storage technologies, continuing with an in-depth techno-economic analysis of the most suitable technologies for Finnish conditions, ...

Suomen Voima Oy is initiating an energy storage project named " Noste " in Kemijärvi. The goal is to build 1-3 small-scale pumped-storage hydropower plants in Northern ...

Global solar and energy storage leader Sungrow has announced the successful commissioning of a 60MWh Battery Energy Storage System (BESS) project in Simo, Finland, ...

SEB Nordic Energy's portfolio company Locus Energy, in collaboration with Ingrid Capacity, has announced the start of construction work on Finland's largest battery energy ...
