

# Fix the solar panels on the tiles

Can you put solar panels on a tile roof?

A typical penetrating mount that lifts solar panels above the roof can be used to place them on tile roofs. Since tiles may require to be removed to make room for mounts, fixing solar panels to a tile roof may involve some additional labor. Know about the difference between solar panels and solar shingles?

How do I repair a roof with solar panels?

Here are a few ways to repair a roof with solar panels. If your roof needs repairs but has large and heavy solar panels installed on top of it, there are a couple of things you should do to make sure the repairs go smoothly without damaging your solar panels or further impacting your roof: Contact the company who installed your solar panels.

What is the new way to replace tiles for solar installation?

The new, better way: Double-flashed tile replacements that perfectly fit in place of a single tile. Replacing small sections of tile with composite shingles, installing mounts meant for composite shingle roofs, and placing dummy tiles over the holes. Cutting or drilling into tiles to attach hooks under them that support solar racks.

How can I repair my solar panels?

To repair your solar panels, start by checking the mounting frame for damage. Ensure that the bolts and cables holding it in place are not damaged. If there has been damage due to strong winds, tighten the solar panels down to secure the mounting frame.

How do you secure solar panels on a roof?

Different methods can be used to secure solar panels on rooftops. The material and pitch of your roof will primarily determine the connection method that is chosen. A typical penetrating mount that lifts solar panels above the roof can be used to place them on tile roofs.

How are solar panels installed?

The roof tiles in the region where the solar panel will be installed are removed, and composite shingles are installed in their place, preventing the panels from being drilled directly into your roof tiles. Sheet metal reinforcement is used at transitions to provide total waterproofness of the roof.
