

# Fixed container power generation chassis

What is a 40 ft containerized generator set?

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% space utilization savings over traditional build designs.

What are containerized generator / packaged container and enclosure options?

Containerized generator /Packaged container and enclosure options provide alternatives to installations in existing or new buildings. We have significant experience with pre-packaged container and enclosure solutions for engine-generator sets,balance of plant equipment,and switchgear.

How high can a genset chassis be stacked?

Chassis can be stacked up to 5 highfor power only transport. Two hot rolled structural steel,ASTM-A572 Grade 50 "I" beams. Wide flange 12" in depth 19 lbs/ft. Whether your containerized genset is 20 ft,30 ft,40 ft or longer,we have the corresponding chassis size to go with it. Our generator chassis can even handle high cubes and overweights.

Why do you need a containerized generator enclosure?

Our containerized generator enclosures offer unparalleled flexibility,durability,and convenience,making them the ideal choice for various industries and applications. Read on to discover why BMarko Structures is your go-to partner for all your containerized generator enclosure needs. Fill Out Our Contact Form Below To Get Started!

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a twin power container?

The Twin Power container solution is a container that combines two engine/alternator assemblies with/without CHP in a 40ft container,making it perfect for applications that require variable or continuous power. Because you have two generators on a single platform,you have the flexibility you need to meet a 100% load or even a smaller load.

A container chassis, an intermodal chassis or skeletal trailer, is a specialized semi-trailer built to transport intermodal containers securely. These chassis are vital in freight and ...
