What is an off-grid inverter?

An 'Off Grid' or 'camping' inverter is a type of inverter that requires battery, wind, or solar power to function. It is commonly used off the grid and can be fixed or portable if small enough.

How much does an off-grid inverter cost?

An inverter converts direct current (DC) electricity into alternating current (AC) electricity. The price of an off-grid inverter will depend on the size of the system you have. A small 600 W inverter can cost you \$200 while a large 4,000 W inverter can cost you \$2,000. If we were to choose an AC refrigerator, this is the one we would choose.
