

Ghana's new energy storage

How has the new government impacted Ghana's energy sector?

The new government led by H.E. John Dramani Mahama has signaled a commitment to greening the national grid by expanding the scope of the Energy Ministry to include the Green Transition in its portfolio. This marks an important policy shift towards greening Ghana's energy sector.

Does Ghana have solar power?

Ghana's daily solar insolation levels range from 4 kWh/m²; to 6 kWh/m²;, with a sunshine duration between 1800 and 3000 hours per year, which offers a high potential for solar electricity generation. Wind energy also holds untapped potential, particularly along Ghana's coastal regions, where wind speeds are favorable for electricity generation.

Is Ghana achieving a green transition?

This marks an important policy shift towards greening Ghana's energy sector. While this is a commendable and bold step, the Ministry has yet to outline a clear roadmap detailing the specific goals, targets, and implementation strategies for achieving a just and effective green transition.

Is captive solar a cheaper alternative to grid electricity in Ghana?

Currently, residential, and commercial and industrial (C&I) customers in Ghana are turning to captive solar generation as a cheaper alternative to grid electricity.
