

# Holland Pack Battery

How much does a battery pack cost?

These battery packs are in between a revised and new battery pack in terms of cost and lifespan. The expected lifespan is 3 to 4 years and you get an 18-month warranty. With our mobile service we can also install the battery pack on location. The costs for this are EUR 75 (only within the Netherlands).

What is the overhaul of a battery pack?

The overhaul of the battery package is as follows: When a battery pack arrives, it is analyzed for functionality. This process is fully automated to achieve as stable a result as possible. After the analysis, the computer generates a report in which the data can be assessed per cell and it can be decided what to do with the battery pack.

What is a BNA battery pack?

A battery pack supplied by bna battery is fully equipped with new battery cells. Where dealers offer a completely new battery package, we reuse the housing and electronics of the existing battery package. Since these can last for years, the quality is guaranteed and we can offer a much more favorable price than the dealer.

What happens if a battery pack is broken?

The broken battery cells are replaced with good refurbished battery cells. After replacing the broken cells, the entire battery is reconditioned so that it is again optimal for use. After the battery pack has been recovered, it will be fully analyzed once again. If there are no more error messages, the battery pack is ready for use.

How long does a refurbished battery pack last?

The service life of a refurbished battery package is between 12 and 24 months. We provide a 6-month warranty on a reconditioned battery pack. With our mobile service we can also install the battery pack on location. The costs for this are EUR 75 (only within the Netherlands).
