

How many watts of solar energy are needed in Sudan

How much solar power does Sudan have?

The installed solar PV capacity in the country cross 200 MWby 2023. Current Solar Energy Landscape Sudan is blessed with abundant solar resources,making it an ideal location for solar power generation.

Can Sudan adopt solar power?

On the other hand,there is a promising potentialin adopting solar power in the country. Germany,the leading country in solar energy,averages less than 140 hours of sunlight per month in its sunniest city Stuttgart. Sudan's location allows it to receive up to 11 hours of direct sunlight daily,equivalent to 436-639 W/m² of solar energy density.

How much sunlight does Sudan get a day?

Sudan's location allows it to receive up to 11 hoursof direct sunlight daily,equivalent to 436-639 W/m² of solar energy density. This equips the country with the necessary resources to leap in the renewable energy sector.

How much electricity does Sudan need?

Despite these urgent efforts,the Sudanese government is currently still unable to finance any immediate solutions that would guarantee a constant and continuous electricity supply. Sudan requires 3,020 MWof electricity production to meet its domestic market needs; nevertheless,its current production capacity is 2,220 MW.

How much solar radiation does Sudan have?

Sudan possesses an average annual radiation range of 436 to 639 W/m² per year,which exceeds the annual global average. The period of solar radiation in the country is between 8.5 and 11 hours per day . There is,furthermore,much unused land available for RE development .

Is Sudan a good place for solar power?

Sudan is blessed with abundant solar resources, making it an ideal location for solar power generation. The country's vast desert expanses receive high levels of solar irradiation, providing a substantial untapped energy source.

As we approach 2024, it's an opportune time to examine the existing policies and regulations in Sudan and anticipate what to expect in the coming year. The installed solar PV ...

Solar energy ranks as the third-largest contributor to renewable energy in Sudan. However, electricity generation from solar energy in 2023 amounted to only 42.4 GWh, representing a ...

How many watts of solar energy are needed in Sudan

The article starts with a brief discussion of the importance of RE in general and in Sudan in particular, followed by an analysis of Sudan's energy sector. This section includes a ...
