

How much does Myanmar outdoor power supply cost

What is the electricity price in Burma (Myanmar)?

The residential electricity price in Burma (Myanmar) is MMK 75.000 per kWh or USD 0.023. The electricity price for businesses is MMK 467.000 kWh or USD 0.144. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Burma (Myanmar) with 150 other countries.

What is the power supply network in Myanmar?

Power outages and brownouts are frequent occurrences. The electricity supply network in Myanmar is managed by the state-owned utility, Myanmar Electric Power Enterprise (MEPE), which is responsible for generating, transmitting, and distributing electricity across the country.

Why is the electricity supply network in Myanmar unreliable?

As a result, the electricity supply network in Myanmar is unreliable, with frequent power outages and voltage fluctuations. This has had a significant impact on citizens and businesses, particularly in rural areas, where access to electricity is limited.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Can Myanmar achieve universal access to electricity by 2030?

It was made possible by attracting substantial private sector financing in power generation and increased public investments in the development of transmission and distribution system. However, the prospects of achieving universal access to electricity by 2030 have dimmed in Myanmar. The growth in access rate has slowed down since 2021.

Can power trade and imports help ease power shortages in Myanmar?

While power trade and imports could help ease the electricity supply shortages, it remains challenging under the current political circumstance in Myanmar. Myanmar's power sector continues to record losses due to a combination of several factors, including currency depreciation, increasing grid maintenance cost, and revenue decline.
