

How to choose a base station power supply

How do I choose a DC power supply?

DC output options available on power supplies can include Anderson Powerpoles, binding posts, set screw terminals, and lighter plugs, or combinations of these. Choose the options most useful to you. Don't worry about buying a power supply with a little extra current capacity. Your equipment will only draw the current it needs--no more, no less.

How do I choose the right size power supply for my Radio?

To the average layperson, all this sounds overly complicated. So to simplify the process, here are some general guidelines for choosing the right size power supply for your radio. Use the manufacturer's amp rating of the radio as the rule. Use the maximum, or peak load rating of the radio, not the standby or typical draw.

Can a mobile radio be used as a base station?

Of course, there is a little matter of power. A mobile radio is specifically designed to operate on DC power from a vehicle. It has no internal power transformer or inverter of its own, so it isn't made to plug into the AC wall outlet of a home or office building. In that case, how do you power a mobile radio for use as a base station? That's easy.

Which base station Radio will plug directly into my wall outlet?

We have selected the Galaxy DX2547 first, as this is the only base station radio that we offer that will plug directly into your wall outlet. You can choose to get a mobile CB radio, like the DX959B, but will require an additional power supply.

What are the components of a base station CB system?

Remember, the longer the CB antenna, the more potential range that you will have. The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna.

Do mobile radios need a power supply?

Mobile radios have different power requirements, and power supplies have different power ratings. Choose the correct power supply for your radio, and you may have years of clean power with no noisy interference and uninterrupted service. Choose the wrong one, and your radio may not be able to transmit or even stay on from the start.
