

Does Hungary have a solar energy program?

Hungary's advancements in its solar energy program are evident in how quickly the highest capacity solar power plants have been outdone by newer plants, as shown throughout the article. Hungary is currently experiencing rapid advances in solar power.

What is the largest solar power plant in Hungary?

The Mátra Solar Power Plant in Visonta was completed in 2015, and it spans 30 hectares (around 0.12 square miles). Its total capacity is 16 MW, allowing it to power 9,000 homes. Until 2019, it was the second-largest solar power project in Hungary.

Will Hungary build a solar factory in Northern Hungary?

There are plans to open a factory dedicated to building solar panels in Northern Hungary, representing an investment of 18.9 billion forints (nearly 6,000,000 USD). This new rapid growth can be attributed to Hungary choosing to follow in the footsteps of the European Union, which hopes to have 30+ percent renewable energy by 2030.

Is solar power a viable option in Hungary?

Solar power has unique potential in Hungary, where 1950 - 2150 sunny hours offer the potential for 1,200 kWh/m² per year, greater than numerous other European nations. Other renewable energy solutions, like hydroelectric power, are less viable in the area.

How much solar power will Hungary have by 2030?

According to the timetable set by the new National Energy Strategy adopted in January, at least 6,000 MW of solar capacity must be operating in Hungary by 2030, which can only be accomplished if large-scale project development starts in the country as soon as possible. Are you considering entering other markets?

Who is Astrasun Solar Kft?

The ASTRASUN Solar Kft. (earlier as Candimpex Budapest Kft.) has opened consciously to the renewable energy market since 2014. The core elements of its activity today are the design, construction, operation and maintenance, investment and development of the solar power plant.
