

Irish home energy storage system quote

Are home battery storage systems a good idea in Ireland?

In Ireland, demand for home battery storage systems -- even without solar panels -- is growing rapidly as homeowners look to reduce costs and gain energy independence.

How much electricity does a 3 bedroom Irish home use?

A typical 3-bedroom Irish home uses roughly 4,200kWh of electricity every single year. If all of the electricity used could be charged on the off-peak tariff you could see an annual saving of EUR635.88. Over ten years, you'd have paid off your battery storage system and also potentially saved EUR1,358.80.

Are battery heating pads good for Irish homes?

Built-in battery heating pads ensure optimal efficiency and longevity during cold Irish winters, maintaining consistent performance year-round. Whether installed indoors or outdoors, SigenStor is fully protected against rain, dust, and wind, making it ideal for Irish homes.

Is SigenStor safe for Irish homes?

Whether installed indoors or outdoors, SigenStor is fully protected against rain, dust, and wind, making it ideal for Irish homes. The system includes a smart fire suppression system that monitors and mitigates risks in real time, adding a crucial layer of safety.
