

Latest prices for photovoltaic panel inverters

Which solar inverter should I buy in 2025?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025.

Which solar inverter should I Choose?

The solar inverter you choose will need to be compatible with the solar system type you are installing: Grid-tied inverters are meant for grid-tied solar systems, the most common system type. They manage a two-way relationship with the grid, exporting solar power to it, and importing utility power from it as required.

When are solar module and inverter prices updated?

Solar Module Retailer Prices are updated on Monday. Solar System and Inverter Retailer Prices are updated on Friday.

How efficient are solar PV inverters?

Modern solar PV inverters, especially those utilizing materials like silicon carbide (SiC) and gallium nitride (GaN), are achieving efficiency levels above 99%, thereby reducing energy losses and enhancing the overall energy output.

Are solar inverters expensive?

They're good at dealing with shade (like power optimizers), and have the additional advantage of making your solar system easy to expand. They are, however, the most expensive type of inverter. Learn more: Inverter types compared

How much does an inverter cost?

This type is cost-effective and easy to set up, especially in areas with consistent sunlight. With prices ranging from \$0.10 to \$0.30 per watt, a typical system for a home with a 3 kW to 10 kW inverter will cost between \$300 and \$3,000.
