

# Lithuania Nalou wind power project supporting energy storage

What is a new energy storage project in Lithuania?

The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA). The deadline for applications is June 17, 2025.

Will Lithuania install 800 MWh of energy storage facilities?

In the procurement exercise, Lithuania is seeking to install at least 800 MWh of energy storage facilities, which will be directly connected to the transmission network by the end of 2028.

How does the EU state aid scheme work in Lithuania?

This measure implements the EUR 180 million state aid scheme approved by the European Commission in October 2024. The plan involves direct grants to support investments in the deployment of at least 1,200 MWh of new energy storage systems across Lithuania. The tender will be administered by the Environmental Project Management Agency (EPMA).

Why is Lithuania launching a major energy storage procurement exercise?

Only a day before cutting ties with the Russian power grid, the Baltic state announced the launch of a major energy storage procurement exercise. Lithuania has announced a EUR 102 million (\$ 105 million) energy storage tender in a bid to procure balancing services to the transmission system operator and ensure the resilience of its grid.

In December 2021, Fluence and Litgrid, commissioned a 1 MW/1 MWh pilot project near Vilnius which serves as a proof-of-concept for the use of battery storage as a transmission asset.

How will Lithuania's energy storage system work? The energy storage system, which will provide Lithuania with an instantaneous isolated operation electricity reserve until synchronisation with ...

The existing "RES Loans to Legal Entities" is being amended, expanding the possibilities of obtaining loans not only for the construction of solar and wind power plants but ...

The Lithuanian program offers capex grants of up to 30% for battery energy storage system (BESS) projects ranging in size from 15MW to 150MW. The primary focus is to enable ...

The four battery energy storage projects, connected to the substations in ?iauliai, Alytus, Utena, and Vilnius, began construction in June last year. These energy storage ...

The loan covers the Telsiai I and Telsiai II onshore wind farms, each with an installed capacity of 60 MW, and
