How good is mobile communication in Maldives?

SIM cards are universal and can fit any slot: micro, nano, or regular. About the quality of mobile communication in Maldives: Overall, it is much worse than ours. This is due to the small size of the islands and low population density. A large island here is considered to be 2 km by 2 km, where 2000 people live, and there are many islands.

What is the internet speed in Maldives?

A large island here is considered to be 2 km by 2 km, where 2000 people live, and there are many islands. Building a mobile network under such conditions is very expensive. Therefore, internet speeds are low, and the price of mobile communication in Maldives and internet is high. By "poor speeds," I mean something like 10 Mbps.

Is roaming as a service dying in the Maldives?

Roaming as a service is slowly dying today. Upon arrival, just find an internet connection and all your messengers, email clients, and social networks will work. Classic communication while traveling is no longer really necessary. Roaming in the Maldives is insanely expensive.

Should you buy a SIM card in Maldives?

The speeds are not great everywhere, but photos load and YouTube works. Overall, you won't be without the internet in Maldives. If you don't need to be online for work all the time and only need internet in your hotel room, then it's not worth buying a SIM card, and you'll save \$50.

How can I save money on roaming in the Maldives?

If roaming is important to you, make sure it is even available in the Maldives, and also turn off data transmission before you depart. This action can save you a lot of money: I have two SIM cards from different operators at home. One has no roaming agreement with anyone in the Maldives. The SIM card simply doesn't work here.
