What is power Edison?

Power Edison was founded in 2016 by industry veterans with the goal of addressing the need for utility-scale, mobile energy storage by giving utilities the ability to move energy to where it is needed. Mobility can be a key differentiator for an energy storage solution.

What makes a good energy storage solution?

Mobility can be a key differentiator for an energy storage solution. For example, mobile storage is often the preferred solution for utility operators to meet rising power demands. Battery energy storage is also used by operators to supplement grid power for up to three years before committing to fixed infrastructure investments.

Why is mobile energy storage a stranded asset?

Stationary storage lacks flexibility, suffers from low utilization and from the risk of becoming a stranded asset. Power Edison addressed these issues by developing mobile energy storage platforms: TerraCharge(TM) and AquaCharge(TM) for mobile land-based and water-based mobile energy storage respectively.

What is terracharge battery energy storage?

The TerraCharge battery energy storage system by Power Edison can make utility-scale energy storage mobile, flexible, and scalable. Power Edison, a provider of utility-grade mobile energy storage solutions, has developed the TerraCharge platform, their newest trailer-mobile battery energy storage system (BESS) for utility-grade applications.

What is a power Edison mobile ESS?

Power Edison mobile systems are designed - from the ground up - to be modular, robust, reliable, flexible and cost-effective electrical capacity resources that can provide a wide spectrum of electricity-related services and benefits. To add even more flexibility, Power Edison mobile ESS's can be purchased, rented or leased.

The GEB High Capacity Power Station is equipped with a powerful AC output of 300W (Peak 350W), making it suitable for charging laptops, powering small appliances, and even running ...
