

# Mobile power portability recommendation

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How do I know if a portable power station is good?

Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip. I like that it has a flashlight (perfect for getting set up in the dark when the power is out).

Are portable power stations democratizing power on the go?

The proliferation of portable power stations is democratizing power on the go. These batteries are great for keeping your devices powered, but they come in different sizes, prices, capabilities, and port options. How do you know which are the best power stations for your specific needs? I've been testing and researching all the hottest ones.

What are the performance metrics for portable power stations?

Currently, we look at two main performance metrics for portable power stations: charge time and discharge capacity. Every company that sells portable power stations provides the expected number of watt-hours its products are supposed to last. That can vary from as low as 240 watt hours to as many as 2,000 watt hours for a larger power station.

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO4 power stations will last for more than 3,000 charge cycles, or about 10 years.
