

# Morocco \$900 million energy storage project

How will financing support a concentrated solar power project impact Morocco?

The project's financing support mechanism will bring down the capital cost of the concentrated solar power to levels comparable with traditional technologies and the wholesale cost of power in Morocco. It is expected to reduce the concentrated solar power global cost curve by 3 %.

Does Morocco have a solar energy program?

Since 2010, the AfDB, in partnership with the CTF, European Investment Bank (EIB), European Union (EU), French Development Agency (AFD), German Development Bank (KfW), Moroccan Agency for Solar Energy (MASEN), and the World Bank, has worked with Morocco to develop the Moroccan Solar Energy Program -- Noor.

How will Morocco's solar program impact the environment?

"The Moroccan solar program will have a direct and immediate impact on the environment once it is completed. This program is going to help Morocco avoid 3.7 million tons of CO<sub>2</sub> emissions. It is also going to allow Morocco to reduce the consumption of combustible fossil fuels by the equivalent of 1 million tons of petrol per year.
