

New energy storage installed capacity 2025

Will battery storage set a record in 2025?

Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power providers added 10.3 GW of new battery storage capacity.

How much battery storage will be added to the grid in 2025?

The EIA forecasts a record 18.2GW of utility-scale battery storage added to the grid this year. This would be a nearly 8GW growth from the 10.3GW installations achieved in 2024, according to the EIA. Moreover, the combined forecast for solar PV and battery storage puts both technologies contributing to 50.7GW of the total 63GW in 2025.

How much storage capacity will be installed in 2025?

In the near term, the report expects 15 GW/49 GWh of new storage capacity to be installed across all segments in 2025, with utility-scale installations projected to grow 22% year-over-year. However, the utility-scale segment is at risk for a potential 29% contraction in 2026 due to policy uncertainty.

How much solar capacity will be added in 2025?

We expect this trend will continue in 2025, with 32.5 GW of new utility-scale solar capacity to be added. Texas (11.6 GW) and California (2.9 GW) will account for almost half of the new utility-scale solar capacity addition in 2025.

How many GW of energy storage installations are there in 2024?

HOUSTON/WASHINGTON, D.C., March 19, 2025 -- The U.S. energy storage market set a new record in 2024 with 12.3 gigawatts (GW) of installations across all segments, according to the latest U.S. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood Mackenzie.

Why did energy storage surge in Q1 2025?

That makes Q1 2025 the biggest first quarter for energy storage in US history. The surge was led by utility-scale projects, which accounted for over 1.5 GW of the new capacity, a 57% jump compared to Q1 2024. "Surging energy demand is putting the electric grid under strain," said John Hensley, SVP of markets and policy analysis at ACP.

In the near term, the report expects 15 GW/49 GWh of new storage capacity to be installed across all segments in 2025, with utility-scale installations projected to grow 22% year ...

EIA expects 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the US power grid in 2025 in its latest Preliminary Monthly Electric Generator ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

The U.S. energy storage market achieved a remarkable milestone in the first quarter (Q1) of 2025, adding over 2 GW across all segments, the highest for any Q1 on record.

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

Grid-scale storage installations are forecasted to reach 13.3 GW in 2025. "After another year of record deployment, energy storage is solidifying its place as a leading solution ...

The report also notes that the US commissioned 11.9GW of battery energy storage system (BESS) capacity last year, a 55% increase from the previous year, the fifth consecutive ...

In 2024, power providers added a record 10.3 GW of new battery storage capacity and EIA projects this growth could almost double to an addition of 18.2 GW in 2025. The rest of the ...

4 days ago· 1. Key Figures The US solar industry installed 7.5 gigawatts direct current (GW dc) of capacity in Q2 2025, a 24% decline from Q2 2024 and a 28% decrease since Q1 2025. Solar ...

Support CleanTechnica's work through a Substack subscription or on Stripe. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the ...

Cumulative Installed Capacity of New Energy Storage Surpasses 100GW for the First Time As of the first half of 2025, China's cumulative installed capacity of new energy ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...

By the end of the first half of 2025, China's new-type energy storage had maintained a stable and rapid growth trajectory. The total installed capacity reached 94.91 GW / 222 ...

New energy storage installed capacity 2025
