

# New energy storage project in Cyprus

Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government /MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a "unique set of energy challenges, which require tailored solutions."

12 hours ago; The municipality of Aradippou officially opened a new photovoltaic park, which is an important part of Cyprus's strategy for transitioning to renewable energy sources. Cyprus ...

Cyprus will begin implementing renewable energy storage systems in 2026 at the earliest, Energy Minister George Papanastasiou announced during parliamentary discussions ...

The present study performed in the framework of "Storage & Renewables Electrifying Cyprus" project

# New energy storage project in Cyprus

(SREC, INTEGRATED/0916/0074). SREC project is co-financed by the European ...

Cyprus will have its first large-scale electricity storage infrastructure in place within 16 months, Minister of Energy George Papanastasiou has said. Speaking at an event in ...

The country plans to rely on a mix of solar energy and natural gas in the near future, with the goal of moving toward a fully electric energy system. The ETYFA natural gas ...

This is a new strategic bilateral collaboration between the University of Cyprus and Cyprus Public Transport, aiming to develop an advanced energy management solution for ...

Sudan's New Energy Storage Industry Project: Lighting Up the Future with Sunshine & Innovation Ever wondered what happens when a sun-drenched nation decides to turn its scorching rays ...

The government plans to complete a new energy storage system, along with storage installations at two Electricity Authority of Cyprus (EAC) power plants, by June 2026, ...

1 day ago&#0183; In 2019, Cyprus identified a big need to add electricity storage to its long-term energy plans. "Energy storage is something new for Cyprus," - says Partasides, an energy specialist ...
