

Norway 100MW energy storage project

Constructed of lightweight carbon fiber composite, the ferry - a 42-foot-long catamaran - carries passengers on sightseeing trips through a fjord off the coast of Norway. To meet new harbor ...

The Oslo Grid Energy Storage Project is rewriting the rules of renewable energy management - and doing it with Scandinavian flair. Let's unpack why this initiative matters to engineers, ...

This system, with a capacity of 100MW/200MWh, will be both the largest battery energy storage project built in the Nordics and the first two-hour system developed by Ingrid ...
