What makes a good outdoor speaker?

Power handling is arguably the most important metric of quality for outdoor speakers, particularly because sound doesn't carry as well outdoors. And the amplifier or receiver has to be able to supply enough power to the speakers.

Do outdoor speakers need an amplifier or receiver?

The answer to that is actually no. You can connect and power outdoor speakers with a regular amplifier or receiver just fine, and that is in fact how you're generally supposed to set up outdoor speakers. There isn't really such a thing as an "all-weather" outdoor speaker amplifier or outdoor receiver.

Do I need a weatherproof amp or receiver for outdoor speakers?

People who are interested in setting up an outdoor sound system often wonder and ask if they need a special type of "outdoor" or "all-weather" amp or receiver - something that's also weatherproofed and specifically designed to sit outside - to power outdoor speakers. The answer to that is actually no.

What are outdoor speaker depot mono subwoofer amplifiers?

For outdoor applications, Outdoor Speaker Depot mono subwoofer amplifiers allow you to design a system that overcomes ambient noises like traffic and wind, so sound comes through clearly and robustly.
