A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

What is the best portable power station?

If power and battery capacity are what you are after, the Delta Pro is the ultimate large-form power station. If you are searching for a compact portable power station for on-the-go activities, the Jackery Explorer 300 is our recommendation. This unit is ideal for charging phones and laptops or running small appliances like lights and fans.

How to choose a portable power station?

Charging speed is a major consideration when evaluating portable power stations. Faster charging means less downtime and more productivity. Imagine you're on a camping trip, and your devices need a quick recharge. Look for power stations with multiple input options. USB-C, solar panels, and car adapters can provide versatility and faster charging.

Can a portable power station charge a phone?

Some can only charge phones, and others can power your entire house. Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip.

What are the best power station Chargers?

Their P1000 Plus model is highly regarded. It offers a large battery capacity and multiple output options. OUKITEL focus on sustainability is also impressive. Anker, known for phone chargers, is now in the power station market. Their PowerHouse series is compact and efficient. Anker's reputation for quality extends to their new products.

How much power does a portable power station need?

For portable power stations, capacity is measured in watt-hours (Wh), telling you how much energy the unit stores. Weekend adventures typically need 200-300Wh for smartphone charging and LED lighting. Glamping and campground camping with amenities require 500-700Wh units to power fans, portable coolers, and CPAP machines.

OK first, your Leaf is limited to how much power it can draw. (it's a fine car, it's just a city car - it's not designed for rapid AC charging at hotels.) Large charging circuits are bonkers, but for the ...
