How much power can a Philips Hue outdoor power supply withstand?

The bottom line is that the maximum power is a little more than 70 watts, much more than the 40 watt power supply from Philips Hue should be able to withstand. But with a measuring device I was able to make interesting findings. The outdoor power supply seems to have enough reserves.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Are outdoor power strips waterproof?

Some outdoor power strips also function as surge protectors and have built-in fuses that cut off the flow of current when it exceeds the maximum wattage for a standard 15-amp outlet, which is 1,875 watts. Outdoor power strips designed for continuous outdoor use also have an IPX rating, which designates how water-resistant they are.

Can a Loitinsy power strip be used outside?

There are also small mounting brackets on the four corners of the power strip's housing, which give you the option of mounting it to an exterior wall if you plan to use it outdoors over the long term. The Loitinsy power strip's outlets worked well, including all three USB outlets, after splashing the power strip with water.

Are outdoor power strips Wi-Fi Ready?

Some outdoor power strips are Wi-Fi ready, allowing them to connect to your home network. These smart power strips can be controlled via a smartphone app, which is ideal for turning on and off holiday lighting displays.
