How do I know if my outdoor power outlet is tripped?

Check for a tripped circuit breaker at your main electrical box when your outdoor power outlet stops working. GFCI outlets protect your outdoor electrical circuit, so check that outlet next to see if it suffered a trip. Rain and other weather can cause the same problems if the outdoor outlet gets wet.

Are outdoor power outlets safe?

Yes, in many ways, outdoor power outlets are just as safe as the ones inside. However, those outlets must be National Electrical Code (NEC)-compliant and include a weatherproof encasing. Still, the outlet is only as safe as the appliance that you plug into it, so be sure those are safe for outdoor use as well. What Is A GFCI Outlet?

Why is my outdoor power outlet not working?

Although less likely, it's also possible that your outdoor power outlet isn't working because of a wiring problem. For instance, the wires that supply the outlet with power could have become loose or broken. Under normal conditions, there's no reason your outdoor power outlet's wiring would experience any disturbances.

Should you buy an outdoor power strip?

If those two sockets in your outdoor outlet aren't enough to fulfill your outdoor power needs, then you'll want to invest in a good outdoor power strip. These handy appliances can multiply a single socket into six or even 10, allowing you to power multiple strings of lights or various outdoor appliances simultaneously.

Why does my outdoor power outlet get Wet?

Rain and other weather can cause the same problems if the outdoor outlet gets wet. Lastly, check that the outlet or its wiring is faulty. Whether you want to troubleshoot the outdoor power outlet yourself or with the help of an electrician, you'll discover everything you need to know in this guide.

Do you need a cover for a power outlet?

Install the cover to protect the exterior outlet from the elements (rainwater, dust, etc.). The outlet and its weatherproof cover should be securely fixed to the external wall. Only reconnect the power when you're sure you've completed the wiring and done it properly.
