

Outdoor power supply with amplifier

Do outdoor speakers need an amplifier or receiver?

The answer to that is actually no. You can connect and power outdoor speakers with a regular amplifier or receiver just fine, and that is in fact how you're generally supposed to set up outdoor speakers. There isn't really such a thing as an "all-weather" outdoor speaker amplifier or outdoor receiver.

Do I need a weatherproof amp or receiver for outdoor speakers?

People who are interested in setting up an outdoor sound system often wonder and ask if they need a special type of "outdoor" or "all-weather" amp or receiver - something that's also weatherproofed and specifically designed to sit outside - to power outdoor speakers. The answer to that is actually no.

What is the best receiver/amplifier for outdoor speakers?

1. Sony STR-DN1080 2. Yamaha R-S202BL 3. KEiD Stereo Receiver 4. Pioneer Elite VSX-LX104 5. Sony STRDH190 6. Onkyo TX-RZ720 7. Pioneer SX-10AE 8. Denon AVR-X4500H What to Look for in a Receiver/Amplifier for Outdoor Speakers?

Do powered speakers need to be plugged into a wall socket?

No, powered (or sometimes called active) speakers have amplifiers built into them and merely need to be plugged into a standard wall socket like any other appliance. They are an attractive option for people who can't or don't want to set up outdoor speaker wire.

Can I use my receiver/amplifier as a public address system?

When your receiver/amplifier has a Mic Port, you can connect a microphone to the unit at the front or back and use it as a Public Address system via your outdoor speakers. This is a useful feature when holding functions outdoors.

Can a stereo receiver be used outdoors?

Yes, a stereo receiver can be used outdoors as long as it is designed for outdoor use and has the necessary weatherproofing features to withstand outdoor conditions. Do check the specifications and user manual of your stereo receiver and ensure it is suitable for outdoor use.
