

Photovoltaic solar power generation in Macedonia

What is the current state of solar energy in North Macedonia?

This article explores the current state of solar energy in North Macedonia, the opportunities for growth, and the challenges that must be addressed to maximize its potential. By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years.

What are the benefits of expanding solar energy capacity in North Macedonia?

One of the most compelling benefits of expanding solar energy capacity in North Macedonia is its potential to enhance energy independence. In 2021, approximately 33.2% of North Macedonia's electricity consumption was covered by imports.

How will a new solar plant help Macedonia?

Andi Aranitasi, EBRD Head of North Macedonia, said: "The new solar plant will help the country, which faces severe air pollution from coal, to reduce its reliance on ageing coal-fired infrastructure. It will also generate cheap electricity in times of very high market prices.

How much solar power does Macedonia have in 2022?

By the end of 2022, the country had reached a photovoltaic capacity of approximately 144 MW, with projections indicating rapid growth in the coming years. In 2023 alone, North Macedonia saw an impressive increase in solar capacity, with new installations contributing to a total increase of 251% compared to the previous year.

How many people will a new photovoltaic power plant supply?

Apart from the fact that with the annual production of this new photovoltaic power plant from 15 to 17 gigawatt-hours we will supply the needs of about 2,800 households with electricity, we are also doing a re-cultivation and improvement of 15 hectares of land.

As North Macedonia transitions to a more sustainable energy future, the role of solar energy has become increasingly significant. With its abundant sunlight and favorable climate, the country ...

K-POWER DOOEL is a company specialized in design, construction and maintenance of photovoltaic systems. We focus our efforts on providing cost-effective solar power systems for ...

The new photovoltaic power plant represents a significant step in North Macedonia's transition to cleaner energy sources and the establishment of a climate-resilient ...

The GEN-I Group has put a second large solar power plant into operation in North Macedonia, this time near Kavadarci. With a total power of 12 MW, the plant will generate up to 15,500 ...

Photovoltaic solar power generation in Macedonia

Slovenia-based GEN-I connected its 17 MW solar power plant southeast of Skopje to the grid four months before the deadline. It is the largest photovoltaic facility in North ...

International energy group GEN-I has put a second large solar power plant into operation in North Macedonia, near Kavadarci. With a total power of 12 megawatts (MW), the ...
