

# Price of photovoltaic panel installation in the Czech Republic

Are photovoltaic power plants available in the Czech Republic?

In the Czech Republic, the availability of photovoltaic power plants for households has never been better. According to pwXchange, the wholesale price of solar panels has halved since December 2022. Those who install a typical rooftop power plant can now save up to a hundred thousand crowns compared to the previous year.

How does a rooftop PV system work in the Czech Republic?

In the Czech Republic, a rooftop PV system is usually developed and operated by a third-party developer or directly by the building owner or its affiliates. It is also possible for the building owner to develop the PV system and lease it to a third party, but this is not very common in the Czech market.

Can a building owner develop a PV system?

It is also possible for the building owner to develop the PV system and lease it to a third party, but this is not very common in the Czech market. Third-party developers need to secure the right to use the roof in order to install and operate the PV system. This is usually done by establishing an easement or lease over the property.
