

Replacement of new energy communication power supply battery cabinet in Greece

What is the future of battery storage in Greece?

Overall, following last months public consultation, the Greek ministry of the environment and energy presented a bolder and even more ambitious battery storage program, allowing for longer completion times but retaining the financial and competition guarantees in place.

How long does it take to get a battery system in Greece?

Battery systems sought for the islands that link to Greece's mainland electricity system (e.g. Crete) also have 150 days to apply for the new program. Projects larger than 10 MW need to apply for a grid connection agreement to the transmission network operator, while projects up to 10 MW need to apply to the distributor grid operator.

Which companies are investing in batteries in Larissa?

Enel Green Power is another large company that has already included batteries in two renewable energy projects in Larissa - 83.7 MW and 50 MW. "Although Greece did not take timely steps and the regulatory framework is delayed, we are proceeding with innovative investments in storage," according to its head for Europe Aristotelis Handavas.

Will Greek oil refiners be able to transition to climate neutrality?

The Greek oil refiner has announced EUR 4 billion in investments to support its transition to climate neutrality, with a heavy focus on storage and renewables. All these groups now await a ministerial decree that would allow the Independent Power Transmission Operator (IPTO) to provide connection terms.

As the world transitions towards renewable energy sources like solar and wind, the need for reliable and efficient power storage has never been more critical. At the core of this ...
