

Who is Slovak solar?

Slovak Solar s.r.o. is a leading photovoltaic wholesaler in Slovakia, Czech Republic and Austria, with a vision to create a sustainable energy future. We started our journey in 2009 with the main idea - to provide companies specialised in the installation of solar systems with access to first-class photovoltaic products, all from one place.

Why should you choose Slovak solar?

At Slovak Solar, we believe that progress comes from constant innovation. From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV).

Should SHPPs be integrated into Slovakia's energy mix?

The integration of SHPPs into Slovakia's energy mix could be a strategic move towards enhancing the country's energy landscape, offering a sustainable and efficient method to increase renewable energy production while contributing to local development and environmental conservation.

What is BIPV & how does it work in Slovakia?

From day one, we've been breaking new ground in Slovakia's solar energy sector. We were one of the first company in Slovakia to install Building-Integrated Photovoltaics (BIPV). We led the way with the first-ever 400kWh Battery Backup System, even before container-based battery systems became mainstream.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the construction of wind power plants has almost completely halted, with two small wind parks existing in Cerov and Myjava.

How much electricity does Slovenské elektrárne produce?

As reported by Slovenské elektrárne, the power plant has already generated over 150 GWh of electricity and is currently producing enough to meet the needs of approximately 750,000 households. The culmination of this testing phase will be running the unit continuously at 100% output for 144 hours.

We offer photovoltaic panels, photovoltaic inverters, battery storage and other components necessary for the construction and installation of solar energy systems. We have ...

Regression equations characterize time relations between the tilt or azimuth angle and the energy produced by the photovoltaic system in Southern Slovakia. Obtained simplified ...

Slovakia Photovoltaic Solar System Models

PVGIS provides you with a detailed and precise simulation of your solar yield, regardless of your location among more than 21,000 cities worldwide. With PVGIS, access independent and ...

With a reputation for excellence, we specialize in providing comprehensive solar energy solutions for both residential and commercial clients. As one of the top solar EPC companies in ...
