

South Korea lithium battery and energy storage projects

Construction began in 2022 after a two-year feasibility study and was executed in phases across six substations: Yeongju, Hamyang, Yesan, Yeongcheon, Shinnamwon, and ...

It plans to spend most of it on building its lithium reserves for electric-car batteries in an effort to counter potential shortages amid heightened geopolitical tensions, the person said.

2 days ago; South Korean companies are trying to weather a prolonged slump in the global battery industry by partnering with leading firms in Europe and the United States.
