

# The base station power keeps flashing

How do I fix a blinking light on a base station?

If Astro command center is downloaded on pc/Mac and the firmware is up to date and you're still having the blinking light issue, then try this: Plug your Base Station into a PC in PC Mode. Locate the pin hole on the bottom of the Base, in the top left corner. Using a paper clip/pin/toothpick, press the pinhole for 5-10 seconds.

Why is my base station flashing blue?

The base station flashes blue when it cannot connect to the dispatch. However, you need a paid subscription to use the dispatch services. If you don't have the subscription, the flashing blue light is not related to a dispatch problem.

What does a red blinking light on a base station mean?

Slow red blinking light means the laser in the base station has failed. It will require a replacement. Immediately fast red blinking light and no sound of the motor - it means that either one of the circuits is dead or the motor. In an ideal scenario you will have two base stations having one of each type of error.

How do I know if a base station is not tracking?

You check SteamVR and see that one of the base stations is not tracking. You peek at a base station and see a blinking red light. OH NO! If you still have the base station under warranty, no need to panic, this can happen, you just contact Valve/HTC support (depending where you bought it from) and they will offer you a replacement.

Can a broken base station be replaced?

OH NO! If you still have the base station under warranty, no need to panic, this can happen, you just contact Valve/HTC support (depending where you bought it from) and they will offer you a replacement. Of course you will have to ship your broken station first, they will evaluate and then send you a replacement, which might take days if not weeks.

How do you identify a ve base station?

Vive versions are identified by having a sync 3.5 mm port in the back and glass going to the sides of the device. Vive versions are not being released anymore, as Valve is responsible for producing all the base stations themselves and then selling them to partners. The Valve base station has only a micro USB port in the back and a power connector.
