

The neighbor in front installed solar photovoltaic panels

Can a neighbor put solar panels on a front facing roof?

In a HOA community, none of my neighbors put solar panels on front-facing roofs. The glare can also come from side roofs. It's all about courtesy and accommodating your neighbor.

Does solar glare reflect a neighbor's property?

If the sun's path and the angle of your solar panels coincide, they could reflect glare onto your neighbor's property. This is an element that your installer should consider, especially if you have had your neighbor for some time.

What are common complaints from neighbors about solar panels?

Complaints about glare and aesthetics are more common when installing solar panels, especially if you live in a residential estate or complex. Neighbors may also complain if they weren't aware that you were going to install solar panels.

Does neighbor A obstruct neighbor B's solar panel?

That is, if Neighbor A's tree existed at its current stature before Neighbor B installed his solar panel, then the law may rule in favor of Neighbor A. However, if Neighbor A planted trees or had young trees that grew up to obstruct Neighbor B's existing solar panel, then the law may rule in favor of Neighbor B.

Should you install solar panels on your roof?

Installing solar panels on your roof can be exciting, but it's important to consider potential neighbor complaints. Some neighbors may object to the installation due to concerns about glare and aesthetics, especially in residential areas.

Can a neighbor interfere with a solar array?

As a last option, you can create an agreement with your neighbor to prevent elements that could interfere with your solar array. These could include the height of trees, building of walls, and even alterations to their house, like adding a second story.

I do believe Arizona is one of the states that has "Right to Solar" laws, meaning the neighbor and the HOA cannot prevent you from installing solar panels. They can make ...

Depends on state / local laws. For instance, California has a solar shade control act that prohibits planting trees that would shade a neighbor's solar panels, but only during midday hours (10 to ...

Keeping abreast of recent legislative changes impacting solar installations in HOA communities is crucial. In recent years, many states have enacted laws that make it harder for HOAs to deny ...

The neighbor in front installed solar photovoltaic panels

People all around the country are rapidly learning of the many advantages involved in owning a rooftop solar PV system. While the cost savings and eco-friendly benefits can be ...

My neighbors installed solar panels last year and they produce extreme glare on my property. I live in a ranch style house and starting around 4 PM, lasting anywhere from 1 to ...

The act empowers homeowners to install solar energy systems and provides legal frameworks to protect these rights against unreasonable restrictions. This article explores the ...

The best location for solar would be the front of my roof, facing the street. I'm trying to decide if that is going to look ugly and annoy neighbors. I could put them in the back but that ...

While solar access laws protect a homeowner's right to install solar panels, they do not grant immunity from potential disputes with neighbors. For instance, if a neighbor's tree ...
