

The world s first solar power generation for home use

In 1973, the University of Delaware was responsible for constructing the first solar building, named "Solar One." The system ran on a hybrid supply of solar thermal and solar PV ...

Despite these and other challenges, there is good reason to believe the best days for solar energy lie ahead. The convergence of steadily improving technology, falling costs, ...

Japan new solar super-panels, powered by perovskite solar cell (PSC) technology. These new panels could generate up to 20 gigawatts of electricity -- about the same as 20 ...

Charles Fritts was the first person to generate electricity using solar panels--in 1884--but it would be another 70 years before they became efficient enough to be useful.
