

UK Wind Solar and Energy Storage Power Station Project

4 days ago; Work will start on the world's most powerful battery to store wind and other renewables after its developer secured more than \$1bn of debt and equity funding. The Thorpe ...

Simec Atlantis Energy, which had previously planned to repurpose the old coal-fired power station, has now abandoned those plans in favour of building a giant battery to ...

Zenobe, a grid-scale battery storage specialist, and Wartsila Energy Storage have launched a project designed to store excess power from several offshore wind farms in the ...

Highview Power is creating the largest energy storage facility of its kind, which will store surplus electricity from wind and solar farms. The two-stage Hunterston project is ...

This post investigates the state of the UK battery storage pipeline, year-to-date figures and an insight into the appetite to develop over time. Battery storage is essential for ...

Quinbrook has completed a diverse range of direct investments in both utility and distributed scale onshore wind and solar power, battery storage, reserve peaking capacity, ...

Unlike wind or solar plants, which require large tracts of land, battery storage is a relatively compact form of energy infrastructure. Pacific Green's Richborough Energy Park ...

Plans to install a 40MW solar farm and 50MW of battery storage on the site of its Whitelee wind farm - currently the UK's largest onshore wind farm - are also underway, with ...
