

What energy storage equipment does Grenada have

How much energy can Grenada generate?

According to estimates from the United States' National Renewable Energy Laboratory, Grenada could eventually generate up to 20 MW from wind, 25 to 50 MW from solar, and more than 50 MW from geothermal energy.

Does Grenada have electricity?

As of 2018, 95.3% of the population had access to electricity. Grenada does not produce, consume, import, export, or have reserves of coal. Grenada has no proven reserves of crude oil or natural gas, and does not produce refined petroleum products.

Who is responsible for energy projects in Grenada?

The MOID (Ministry of Infrastructure Development, Public Utilities, Energy, Transport, and Implementation) is responsible for energy programs in Grenada. MOID handles the majority of permitting related to energy projects.

How does MOID work in Grenada?

MOID handles the majority of permitting related to energy projects. Electricity self generators must apply for a permit through the PURC (Public Utilities Regulatory Commission), Grenada's regulatory authority for energy.

Does Grenada produce oil?

Grenada does not produce, consume, import, export, or have reserves of coal. Grenada has no proven reserves of crude oil or natural gas, and does not produce refined petroleum products. During 2016, Grenada consumed 2,000 barrels of refined petroleum products per day, all of which were imported through the St. George's port.

Does Grenada have a climate problem?

The government of Grenada has expressed concerns about climate change, but continues to rely on diesel and refined petroleum products, despite having ample sunshine and active volcanoes that could be utilized for renewable energy. The government aims for at least 30% of electricity to be generated from renewable sources by 2030.

Discover how photovoltaic energy storage containers are transforming Grenada's renewable energy landscape. Learn about their applications, benefits, and real-world success stories.

That's Grenada today - a nation swapping diesel generators for smart energy storage while dancing to soca beats. With IMF projecting 3.9% GDP growth for 2025 [1], the "Island of ...
